  - ▶ Yokogawa ETMs
  - ▶ Weschler 2017 Catalog

### Yokogawa PSP Meters

Weschler Instruments has completed the acquisition of the **Power Series Plus** line from Yokogawa's Meters & Instruments Division. These AC switchboard meters feature one, two or three digital displays and easily replace less capable analog meters. Up to three analog outputs allow the **Power Series Plus** to also function as transducers for remote monitoring. The RS-485 communication option permits networking and computer control. Weschler will continue to manufacture the PSP line in the USA. All models are available through existing Yokogawa distributors or directly from Weschler.

### Yokogawa ETMs

Weschler Instruments has also purchased the Elapsed Time Meter (ETM) product line from Yokogawa's Meters & Instruments Division. These meters are UL recognized and available in five case styles. All parts, tooling and equipment to manufacture the ETMs were moved from Newnan GA to Weschler's Cleveland OH headquarters. Customers may order these products from existing Yokogawa distributors or directly from Weschler.

### 2017 Catalog

The 2017 Weschler Instruments catalog is now available. It covers panel meters, sensors, signal conditioners, test equipment and related products from over 50 leading manufacturers. The catalog has 260 pages of our most popular products, divided into 9 sections and compressed to a 12M pdf for easy download and use.
