PIE Process Calibrators

PIE Process Calibrators are now available from Weschler Instruments. These products replace discontinued Altek models and include additional features to speed process verification & troubleshooting. Each unit has a digital readout and front panel adjustment knob. The PIE line includes loop, milliamp, voltage, RTD, and thermocouple calibrators, as well as multifunction, high accuracy and dual channel models.

Byram Switchboard Meters

Byram Labs recently introduced an extensive line of metal-cased switchboard (**MCS**) meters. These 1% accuracy class analog meters directly replace the popular Yokogawa AB-40 & DB-40 series. Functions include DCV, DCA, ACV, ACA, frequency, watts, vars, power factor, synchroscope, RPM, & process indication. IP54 protection is standard and UL Listing is available at no charge. Weschler can provide custom dials, non-standard scaling and quick delivery on the MCS family.

Weschler 2018 Catalog

Rugged, Highly Reliable and Accurate Instrumentation

The 2018 Weschler Instruments catalog includes panel meters, sensors, signal conditioners, test equipment and related products from over 50 leading manufacturers. The catalog has 240 pages of our most popular products, divided into 9 sections and compressed to an 11M pdf for easy download and use. Our updated [line card](#) provides a single sheet summary of products and manufacturers.
